

# CNC720 Breakout

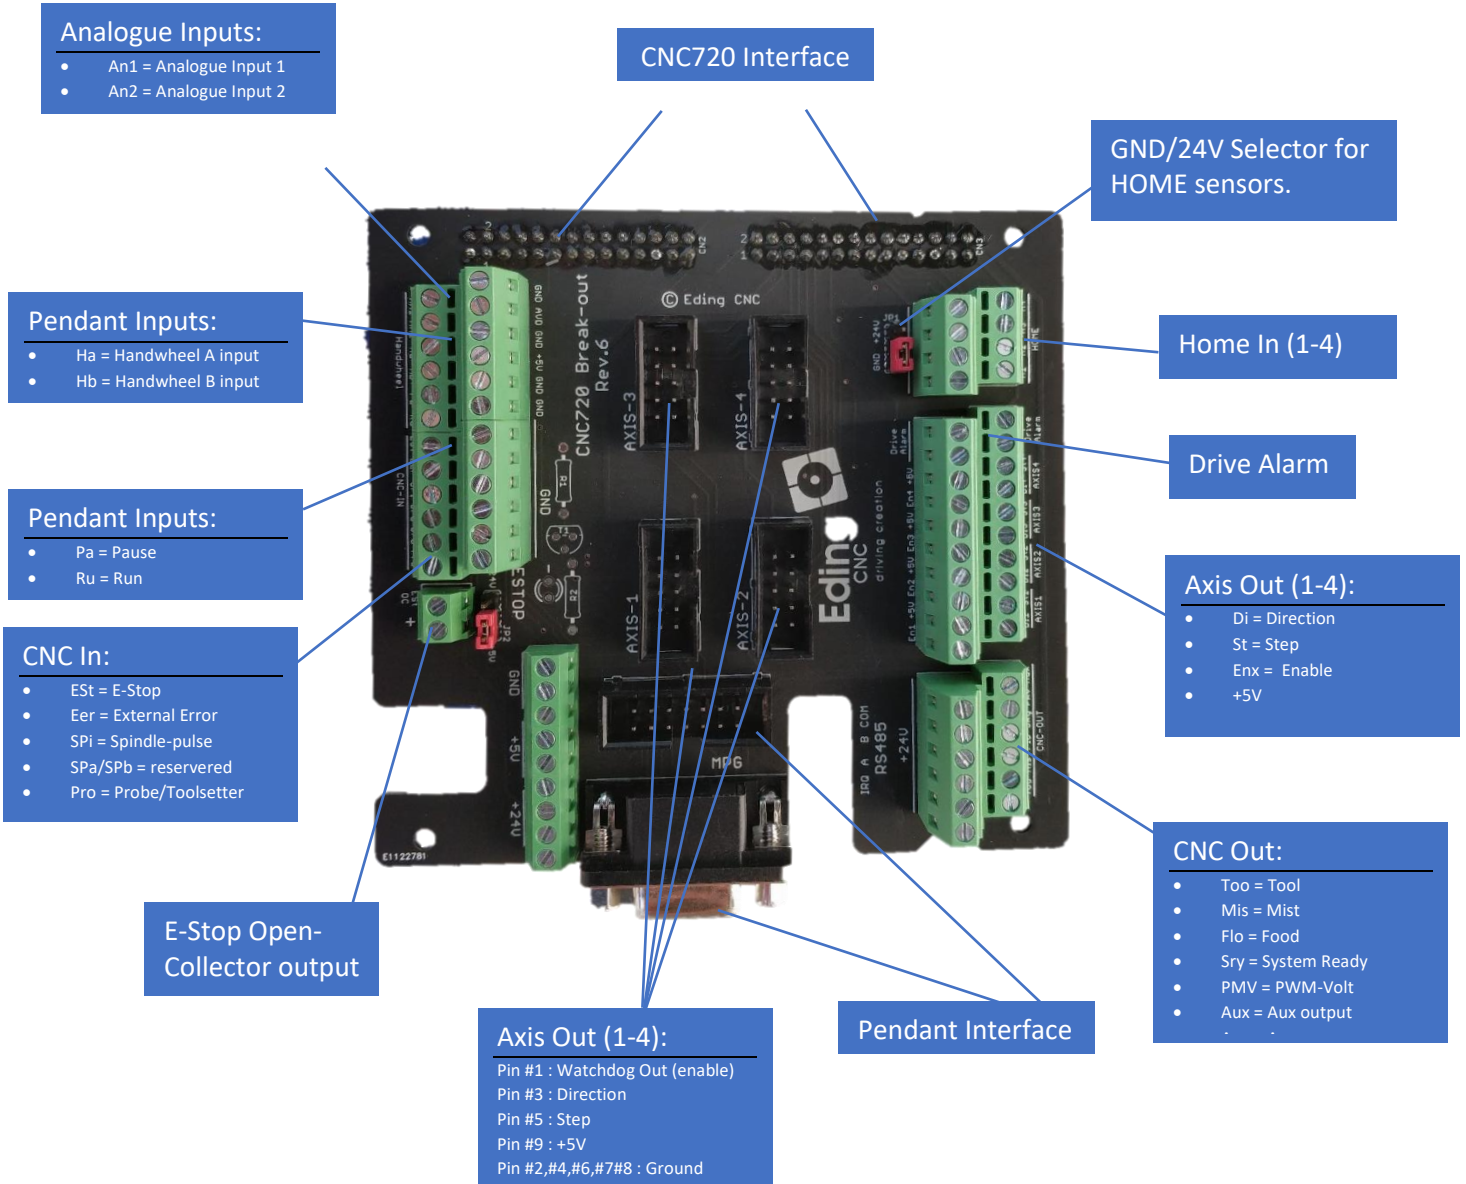

## Contents:

Each breakout board kit contains the following:

- ✓ 1x Breakout Board CNC720
- ✓ 4x PCB Spacer 19 mm
- ✓ 4x PCB Spacer 8 mm
- ✓ 8x Screw M3 6 mm

## Overview:

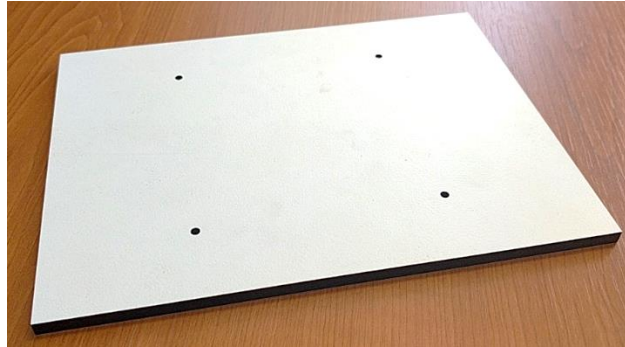

## **Installation:**

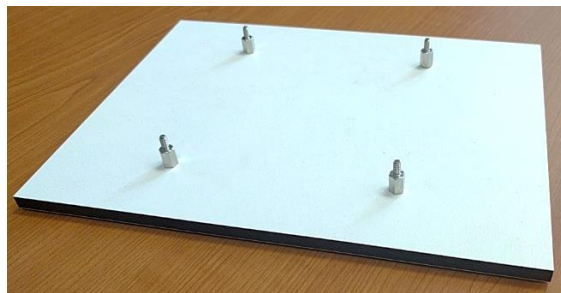

The kit contains all the mounting material to mount a CNC720 controller and breakout board.

### **Step 1. Create mounting holes**

The first step is to make holes for mounting the CNC760. On our website, the dimensions can be found.

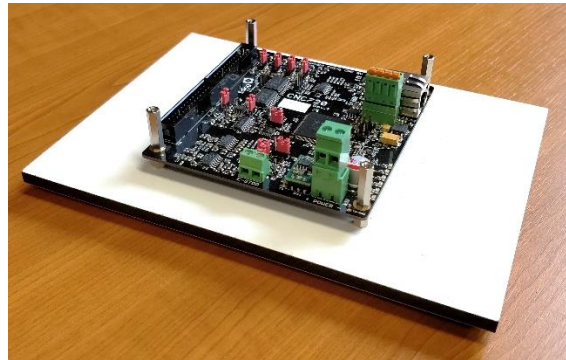

### **Step 2. Mount bottom spacers**

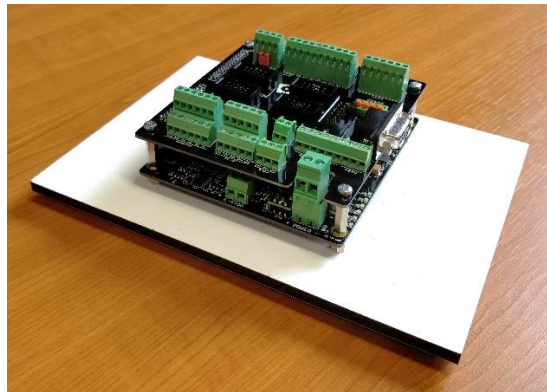

### **Step 3. Mount CNC720**

**Step 5. Mount top spacers**

**Step 6. Mount the breakout board and fix the board with the four M3 screws**

***You're done !***

## Setup:

The switch used for the HOME sensor can be connected to GND or 24V, this can be selected by the jumper on the breakout board.
